**STEP 1**

Your Combination Lock is set at the factory to open at “-0-0-0-0”  
To set the new code, you need to turn dials to the correct code firstly.

**STEP 2**

press and hold the code setting button

**STEP 3**

Set dials to the desired combination and release the button.

**STEP 4**

Scramble the new code to lock the door.

**For further information please contact your probe distributor**

## PROCEDURE TO OPEN LOCK IN CASE OF **CODE LOSS**

- Step 1 Insert decoder into gap between dial and lock casing as per the illustration below
- Step 2 Hold decoder lightly and turn the dials through the number sequence
- Step 3 When you reach the correct number the decoder will 'sink' into the gap
- Step 4 Repeat the above steps for each dial until you have found all 3 numbers
